Strain rate sensitivity of automotive sheet steels: influence of plastic strain, strain rate, temperature, microstructure, bake hardening and pre-strain

By Patrick Larour

Shaker Verlag Jun 2010, 2010. Buch. Book Condition: Neu. 21x14.8x cm. Neuware - This experimental work shows the different parameters influencing the strain rate sensitivity behaviour of automotive sheet steel grades in crash conditions. Most investigations have been performed in the strain rate range [10-3-200s⁻¹] and temperature range [233-373K] with servohydraulic tensile testing machines. Additional Split-Hopkinson bar testing results up to 103s⁻¹ have also been included at room temperature. The focus has been laid on the 'apparent' strain rate sensitivity, determined based on multiple dynamic flow curves at constant strain rate in a semi-logarithmic (b10 values) or logarithmic (m values) way. It has been shown that the dynamic behaviour in the investigated strain rate and temperature range is clearly thermally activated for a wide range of automotive sheet steels. This means that an increase in strain rate is nearly equivalent to a decrease in temperature. The strain rate sensitivity values are dependent on the strain rate range considered, as well as on the temperature and plastic deformation range chosen. The strain rate sensitivity decreases with increasing plastic strain level due to a gradual exhausting of work hardening potential combined with adiabatic softening effects. The strain rate sensitivity increases with decreasing...

Reviews

This publication is very gripping and interesting. It can be loaded with knowledge and wisdom I am just quickly will get a enjoyment of studying a composed pdf.

-- **Terence Gutmann I**

This pdf may be worth acquiring. I actually have read and i also am sure that i am going to planning to read through once again once more in the foreseeable future. I am delighted to inform you that this is actually the finest publication i actually have read inside my individual life and can be he greatest publication for at any time.
