The Alchemy Of The Heavens offers an exciting and accessible survey of what we know about our galaxy. The home of the earth, the sun, and countless other stars, the Milky Way has long been an object of human fascination, but its been in the last forty years that astromoners and astrophysicists have made the most startling discoveries about our galaxy. Author Ken Croswell reveals that the Milky Way formed as many earlier galaxies collopsed and smashed together; that may of the elements in the galaxy--including the iron and carbon that course through our bodies--were born in exploding supernovae; that in all likelihood there is a massive black hole at the center of the galaxy, with a million times more mass than the sun, and that the Milky Ways oldest stars preserve the elements created in the big bang, thereby serving as fossils of the universes earliest days. A captivating journey through the modern astronomy of the Milky Way, Croswell shows us how a deeper understanding of the nature and working of the galaxy can offer larger clues into the origins of the universe itself. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Paperback.
